

Coffee was never *this good*.

Did you know that...

...\$4 of every bag sold goes directly to the DREAM Project, so that children in the Dominican Republic can learn to read and write?

...our coffee enriches the community through teaching and enriches the environment through sustainable farming practices?

...sun-grown coffee destroys trees and the birds that live in them, but the habitat for organic, shade grown, fair trade coffee helps protect them better than any other crop?

...the expansion of sun-grown coffee fields is causing soil erosion and significant species loss in the Dominican Republic as well as damage to the watershed that provides over half of the population with potable water?

...the endangered Bicknell thrush that lives in the Adirondack Mountains of New York and Vermont spend its winters in the very land where our coffee is grown?

...the coffee follows the same path as the migratory birds it protects, traveling directly from the Dominican Republic to Vermont, with no middle man to drive up prices?

...our coffee is roasted to order, which means you're getting the freshest possible coffee anyone can buy?

...coffee that is not organically grown uses chemicals that can cause cancer and other health problems in the workers who use them?

...all of the coffee consumed in the US is imported, and most of what you can buy is not organic, shade grown or fair trade, let alone all three?

...currently 1,300 small farmers participate in sustainable farming practices in the Dominican Republic, including at Finca Alta Gracia,

and with your help that number would increase?

...by drinking this coffee, you are doing your part in helping to make the world a better place?

Now you do, so drink up!
