

## MEET OUR STAFF !

Under the supervision of the DREAM project Center management team, our library staff has provided, in the past several weeks , the service and assistance you would expect to get in any library in the world. Within few weeks, our staff has mastered the handling of the software system, maintaining regular activities with the children visiting the library and learning about book maintenance, reading out loud techniques and word games. They are now getting ready to support the different groups using the facilities during the Summer Camp.

We want to thank Lee and Eli, the creators of the library for being the inspiration behind the actual library. While Eli is returning to the United States to study, Lee will be running this year for Summer Camp. Come September we will surely miss their smile and their energy but their legacy will go on.

Dave, our Consultant Librarian, will return in August with more training projects for our staff. Thank you Francis, Yaritza, Sandro, Rosa, Ruth Esther and all our regular patrons for making this library so alive.

Check us out online at: <http://www.youtube.com/watch?v=6iPmqPkA1E0>

To see how we evolved in the past few months.

September 19, 2008 will be our  
Fabulous Fun Fundraising event  
MORE TO COME...

*From the beginning of July, the library will be a buzzing beehive with over 250 students assisted by over 60 teachers and volunteers, using the library facilities as part of The DREAM Guzman Ariza Summer School & Camp. This program provides guidance and academic enrichment to the participants, implementing quality academic tutoring programs that target students' literacy, math, writing and ESL skills. Students who are behind become engaged in academics, which in turn, affect their performance and attendance in the academic school year.*

### OUR WISH LIST

Still going strong...

Below are two samples of the beautiful books that were purchased through our wishlist and that are on their way.

These Spanish language books are specially selected for their appropriate content and we usually try to get the

Library Binding version or the hardcover in order to maintain our inventory attractive, durable and efficient.
